"Senior Platform / Backend Engineer with **10+ years of experience** designing, building, and operating **distributed backend systems** across media, fintech, food-tech, and travel domains. Deep expertise in **cloud-native architectures, event-driven platforms, and microservices at scale**, with a strong focus on **reliability, performance, and system ownership**. Proven track record of standardizing platform foundations, integrating complex ecosystems, and delivering **high-availability production systems**"

Skills

Languages & Runtime:- TypeScript, Node.js, JavaScript, Java, Go

Backend Frameworks & APIs:- Express.js, custom Node.js frameworks, GraphQL (Backend-for-Frontend), Spring Boot, Hibernate, Gin

Cloud & DevOps:- AWS (Lambda, ECS, SQS, SNS, S3, IAM, DynamoDB, RDS), Docker, Jenkins, CI/CD (GitHub Actions, CircleCI)

Architecture & Design:- Microservices, Event-Driven Systems, Backend-for-Frontend (BFF), RESTful APIs, Distributed Systems, Test-Driven Development (TDD)

Messaging & Streaming:- Kafka, AWS Kinesis

Data Stores:- MongoDB, Mongoose (ODM), DynamoDB, PostgreSQL/MySQL, AWS RDS, Redis, ElasticSearch

Compliance & Security:- GDPR, CCPA, OneTrust, secure data deletion and access controls

Observability & Reliability:- Structured logging, OpenTelemetry, AWS CloudWatch monitoring and alerting

Testing:- Jest, Sinon, Newman, Mocha-Chai, JUnit

Experience

Warner Bros. Discovery (via Robosoft Technologies) / Senior Software Engineer August 2021 - Present, Remote (Washington DC / Bengaluru)

→ **Platform Context:-** Global, high-traffic media platform serving multiple brands with personalization, CMS, BFF services, and compliance-critical workflows.

- ◆ Owned and developed **Node.js/TypeScript microservices** for the **Motif content platform**, supporting global brands including Food Network, CNN, Eurosport, Magnolia, Golf Digest, and MotorTrend.
- ◆ Designed a **loosely coupled microservices architecture** to enable personalized content delivery and independent service scalability.
- ◆ Enhanced the **"Sauce" CMS** by introducing automated workflows, enabling real-time editorial collaboration across distributed teams.
- ◆ Architected and implemented **AWS-native infrastructure** using **Lambda, ECS, SNS, and SQS**, focusing on scalability, fault isolation, and cost efficiency.
- ◆ Applied **Infrastructure as Code** practices to standardize cloud environments and deployment workflows.
- ◆ Owned and standardized **REST and GraphQL API design patterns**, reducing cross-team integration friction and onboarding time.
- ◆ Integrated **OneTrust** to support **GDPR/CCPA compliance**, enabling secure user-data access, deletion, and auditability across services.
- ◆ Delivered a scalable **Backend-for-Frontend (BFF)** for Food Network using **GraphQL**, with robust authentication, authorization, observability, and proactive monitoring.

→ **Platform Impact:-**

- ◆ Multi-brand, globally distributed platform
- ◆ Compliance-critical workloads
- ◆ Standardized service foundations at scale

Swiggy Dineout / Senior Software Engineer

December 2019 - August 2021, IN, KARNATAKA, Bangalore

→ **Platform Context:-** High-volume, event-driven integrations platform connecting POS systems, marketing, and user segmentation pipelines.

- ◆ Designed and built an **event-driven integration platform** connecting **10+ third-party POS systems** using **Kafka** and **Redis**.
- ◆ Reduced transaction latency by approximately **50%** through asynchronous processing and optimized data flows.

- ◆ Developed **segmentation and analytics pipelines** using **MongoDB and ElasticSearch**, enabling real-time behavioral targeting.
- ◆ Implemented backend systems to trigger **personalized marketing campaigns** based on platform events.
- ◆ Delivered **enterprise-grade microservices** on **AWS** contributing to a **~25% annual revenue increase**.

→ **Platform Impact:-**

- ◆ Kafka in production at scale
- ◆ Latency-sensitive systems
- ◆ Revenue-driven platform ownership

PT Teknologi Tujuh Asia / Senior Software Engineer

November 2018 - December 2019, Jakarta, Indonesia

→ **Platform Context:-** Fintech lending platform with automation, risk assessment, and compliance requirements.

- ◆ Built a **P2P lending platform** using **Node.js/Express.js, MongoDB, and AWS**.
- ◆ Automated **~95% of credit processing workflows**, significantly reducing manual operations.
- ◆ Designed system-driven decision pipelines improving approval accuracy by **~25%**.
Implemented **OCR and facial recognition** for KYC and identity verification.
- ◆ Built an **NLP-based scoring engine** to enhance risk analysis and reduce operational errors.

→ **Platform Impact:-**

- ◆ Compliance-aware automation
- ◆ High-confidence decision pipelines
- ◆ Reduced processing latency and error rates

Earlier Platform & Backend Experience / Software Engineer

January 2015 - November 2018, IN, KARNATAKA, Bangalore

- Built backend services and **REST APIs** for travel-tech, enterprise, and client-driven platforms.
- Worked on booking, reservation, analytics, and internal business systems.
- Delivered **end-to-end solutions** spanning architecture, development, deployment, and production support.
- Established strong foundations in **backend ownership, API design, and system reliability**.

Certifications

AWS Certified Developer – Associate (2024–2027)
https://www.credly.com/badges/cdcca7ea-6962-4019-919c-650b4fa4778a/linked_in_profile

Apollo GraphQL Developer – Associate (2025)
<https://www.apollographql.com/tutorials/certifications/Ofac3218-dfff-4b48-aa1f-8db6cf47aeb6>

Education

Tezpur University / Master's in Computer Applications
August 2012 - August 2015, IN, ASSAM, Tezpur

Gauhati University / Bachelor's in Computer Applications
August 2009 - August 2012, IN, ASSAM, Guwahati
